Assignment Instructions

- Find three examples of data visuals from scientific papers
    - One example must be of good/effective data visualization
    - One example must be of mediocre data visualization
    - One example must be of poor/ineffective data visualization
- Present your examples to the class in a slide show (three slides) and explain your rationale for your choices
- For each visual please provide a list of pros and cons (minimum of 6 pros and/or cons for each visual)

Grading Rubric

Criteria	Description	Points
Selection	Were the selections appropriate examples of good/mediocre/poor data visualizations?	/1
Rationale	Was the rationale for the selection as well as pros/cons thoroughly explained?	/2
Improvements	Were appropriate improvements suggested for how to make the mediocre and poor data visualization examples clearer?	/2
	TOTAL	**/5**
